

2023

# AERO INDIA

The Runway to a Billion Opportunities

13<sup>th</sup> - 17<sup>th</sup> February 2023

Air Force Station, Yelahanka, Bengaluru  
Karnataka, India

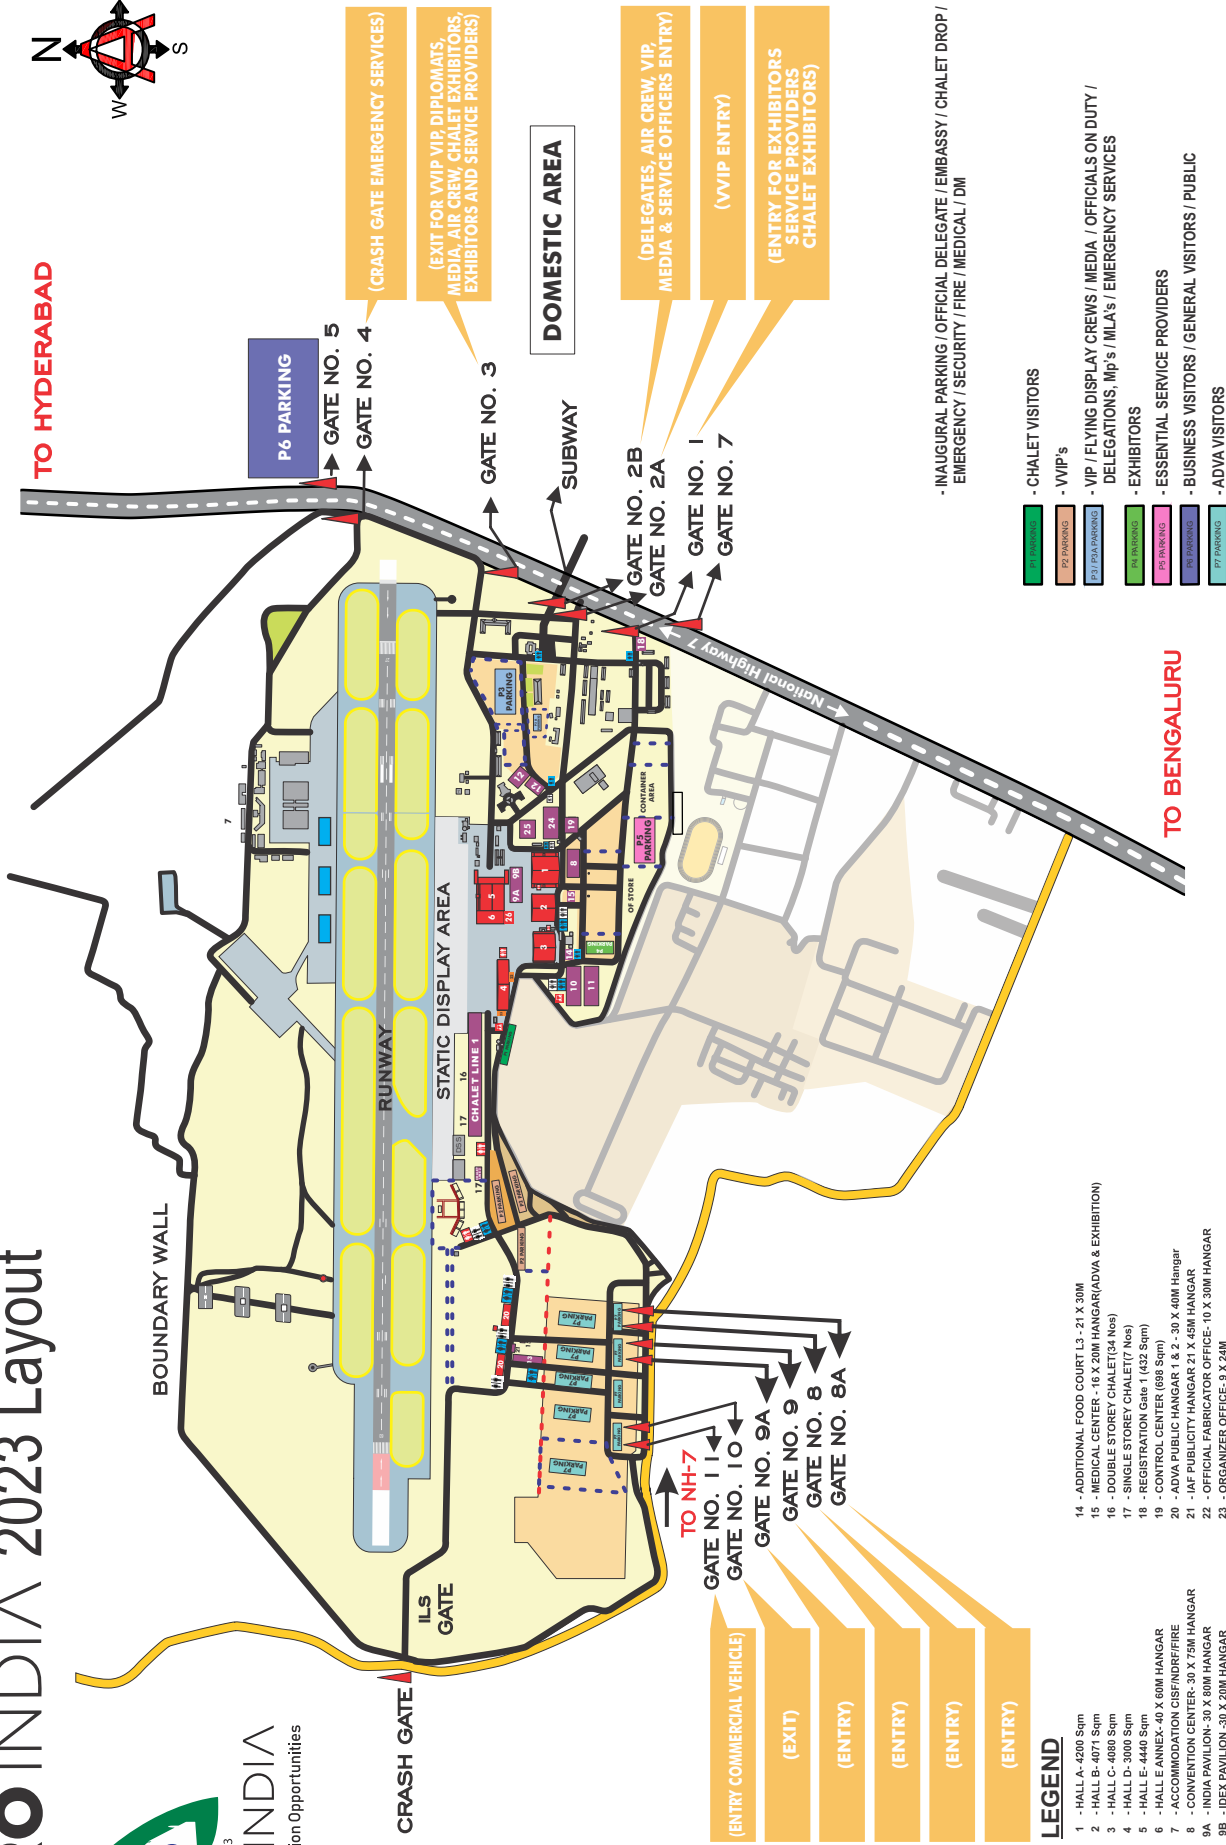

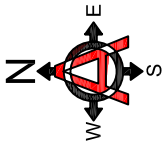

## Exhibitor Directory

# AERO INDIA 2023 Layout

**AERO INDIA**  
2023  
The Runway to a Billion Opportunities

- 1 - HALL A- 4200 Sqm
- 2 - HALL B- 4071 Sqm
- 3 - HALL C- 4880 Sqm
- 4 - HALL D- 3000 Sqm
- 5 - HALL E- 4440 Sqm
- 6 - HALL E ANNEX- 40 X 60M HANGAR
- 7 - ACCOMMODATION DISPENSARY
- 8 - CONVENTION CENTER- 30 X 75M HANGAR
- 9A - INDIA PAVILION- 30 X 60M HANGAR
- 9B - IDEX PAVILION- 30 X 20M HANGAR
- 10 - FOODCOURT L1- 30 X 70M HANGAR
- 11 - FOODCOURT L2- 30 X 70M HANGAR
- 12 - FOODCOURT L3- 15 X 40M & 30 X 40M HANGAR
- 13 - ADVA FOOD COURT- 30 X 70M HANGAR
- 14 - ADDITIONAL FOOD COURT L3- 21 X 30M
- 15 - MEDICAL CENTER - 15 X 20M HANGAR(ADVA & EXHIBITION)
- 16 - DOUBLE STOREY CHALET(4 Nos)
- 17 - SINGLE STOREY CHALET(7 Nos)
- 18 - REGISTRATION GATE 1 (832 Sqm)
- 19 - CONTROL CENTER (698 Sqm)
- 20 - ADVA PUBLIC HANGAR 1 & 2 - 30 X 40M HANGAR
- 21 - IAF PUBLIC HANGAR 21 X 45M HANGAR
- 22 - OFFICIAL FABRICATOR OFFICE- 10 X 30M HANGAR
- 23 - ORGANIZER OFFICE- 9 X 24M
- 24 - HALL G EXHIBITION- 40 X 70M HANGAR
- 25 - HALL H EXHIBITION- 40 X 40M HANGAR
- 26 - HALL I EXHIBITION- 40 X 25M HANGAR

- EXISTING TOILETS (8 Nos)
- PAGODA TOILETS (12 Nos)
- AC MOBILE TOILETS (6 Nos)
- FENCING
- BARICADING
- INTERNAL IAF FENCING
- EXTERNAL IAF FENCING
- GOLF CART CHARGING POINT

- INAUGURAL PARKING / OFFICIAL DELEGATE / EMBASSY / CHALET DROP / EMERGENCY / SECURITY / FIRE / MEDICAL / DM
- CHALET VISITORS
- VVIP's
- VIP / FLYING DISPLAY CREWS / MEDIA / OFFICIALS ON DUTY / DELEGATIONS, Mps / MLAs / EMERGENCY SERVICES
- EXHIBITORS
- ESSENTIAL SERVICE PROVIDERS
- BUSINESS VISITORS / GENERAL VISITORS / PUBLIC
- ADVA VISITORS

Contact Person Name : JAYA GOPAN G V

#### Profile

Aarjay International Pvt Ltd is a single source for a wide range of testing & automation solutions. Aarjay brings you standard and proven solutions from global leaders of testing products such as Tektronix, Hioki, ITech, Fluke, Powerside and more. Aarjay supports Make-in-India by developing customized solutions which combine the in-house expertise of our engineers and the unique technologies offered by our OEM partners. Our offerings include electronics test & measurement solutions, radar & GNSS simulators, avionics testing products, automated test equipment (ATEs), factory process automation and condition monitoring solutions. Aarjay has expertise in test application development (C/C++, Python, LabVIEW), PLC-based automation solutions, SCADA systems, data acquisition systems and pneumatic systems. Aarjay serves customers in Aerospace, Defence, Automotive and Industrial sectors. Aarjay is an ISO9001:2015 certified company and is a registered MSME.

### ACUTRONIC INDIA PRIVATE LIMITED

Name : Solasa Harish  
Phone : 9553682851  
Email : asingh@acutronic.ch  
Website : www.acutronic.com  
Contact Person Name : Abhijeet Singh

#### Profile

Acutronic is the global leader in the development, design, and manufacture of Inertial Guidance Test Systems (IGTS), Vibration Test Systems (VTS), and Hardware-In-The-Loop (HIL) motion simulators. These high-precision motion simulators are used in the aerospace, defense, automotive, and consumer electronics industries to test and calibrate inertial sensors (e.g., gyroscopes and accelerometers that measure movement); Inertial Navigation Systems; stabilized electro-optics; Electronic Stability Control Systems; and the in-flight engagement scenarios of missiles. Systems include single- and multi-axis rate tables, flight motion simulators and target motion simulators. Acutronic India Pvt. Ltd, based in Hyderabad, India was incorporated to deliver the best quality products, the best service, and the best customer experience for all the existing and upcoming systems in India. Furthermore, Acutronic is pleased to support the Government of India's "Make in India" policy and will be looking at ways to add value domestically in India.

### ADANI DEFENCE SYSTEMS AND TECHNOLOGIES LIMITED

Name : Sarvam Desai  
Phone : 90999 00956  
Email : sarvam.desai@adani.com  
Website : www.adanidefence.com  
Contact Person Name : Sarvam Desai

#### Profile

We at Adani Defence & Aerospace are committed to help India achieve self-reliance in defence & security. In a short span, we have established capabilities in India across a wide domain such as small arms, unmanned aerial systems, radars, defence electronics & avionics, tactical communication systems, and electro-optical systems with a proven record to support the Indian Armed Forces and other para-military forces in India. Adani Defence has established India's first unmanned aerial vehicles manufacturing facility, India's first private sector small arms manufacturing facility and is currently in process of setting up India's first comprehensive aircraft MRO facility in Nagpur. With the emerging threat of rogue drones, we have taken an initiative of implementing counter drone systems for both defence & civil applications. Through its comprehensive ecosystem of Tier I & Tier II capabilities across the defence supply chain, Adani is well-positioned to facilitate integration of larger platforms.

CARRIS Extra Tough Cases, an aerospace and defence wing of Carris Group; involved in design and development, manufacture and supply of custom moulded, light weight, sturdy, rugged and most importantly eco-friendly products. Our boxes are manufactured through ROTO MOULDING technology as per MIL STD 810F, JSG 0102:1984 & JSS 0253 & 55555. Also our cases airworthiness has been certified by DGAQA, a defense wing of the Ministry of Defence. Rotational Moulding technology is contemporary and a step ahead of Fibre Reinforced Plastic (FRP), wooden & metal boxes. Our esteemed clients in India are HAL, BEL, Ordnance Factories and DRDO, and we export to various other countries as well. For more details about our products, please visit our website [www.carriscases.com](http://www.carriscases.com)

#### **Profile**

Cingularity TEC India Pvt Ltd Aerospace division, founded in 2014 is an industrial and military grade engineering and manufacturing company. A producer of small and large commercial drones, Cingularity provides revolutionary and effective aerial systems. Cingularity adapts its secure, proprietary aircraft structure components design and manufacturing including avionics for drone airborne mission, combining natural and accurate flight dynamics based on manned aviation flight paths and guidance systems. Cingularity offers new capabilities to the emerging drone industry with task-specific drones and systems enabling even the most challenging heavy lift, long endurance, and delivery missions, globally. We work for and partner with our clients HAL, DRDO Labs, IISc, NAL, L&T, 3M, Samsung India and many more prestigious organizations.

CSIR-National Aerospace Laboratories (NAL), is the only government aerospace R&D laboratory in the country's civilian sector. CSIR-NAL is a high-technology oriented institution focusing on advanced disciplines in aerospace. CSIR-NAL has several advanced test facilities, and many of them are recognized as National Facilities. These are not only the best in the country, but are also comparable to other similar facilities in the world. CSIR-NAL has provided significant value added inputs to all the Indian national aerospace programmes. CSIR-NAL has also developed many critical technologies for the strategic sector and continues to support the mission-mode programmes of the country. The CSIR-NAL's mandate is to develop aerospace technologies with strong science content, design and build small, medium sized civil aircraft, and support all national aerospace programmes.

DCM Shriram Industries Ltd is into line manufacturing of Unmanned Aerial Vehicles. We have developed an easy to customise, scalable base platform with innovative touches which extend the performance capabilities. The UAV Systems have been designed to meet the stringent operational requirements of the Security Forces. They offer crash resistance, stable flight characteristics and up to 10% more flight time when compared to its competitors. It is a man pack scalable platform with less deployment time and can be customized based upon the application. The niche technology, aerodynamic shape and rugged composite material of the UAV, offers best in class speed and endurance. With Swappable Payloads it provides the flexibility to use the UAV for different applications such as Surveillance, Geospatial Mapping and Asset Inspections.

Deepali Designs & Exhibits is a pioneer in the experiential communication industry, with an impeccable track for serving requirements related to organizing large scale events and exhibitions like the Commonwealth Games, customized event venue set up, make shift hospitals etc.

We carry with us the experience of over three decades in the industry, which has enabled us gather genuine command, in-depth know-how and adequate infrastructure for building customized modular structure. We have been able to set industrial benchmark in development of structures in an array of materials including- but not limited to- mild steel, aluminum, fiber, other metals & alloys for large-scale events.

Our dedicated R&D team helps us make the most of technological and engineering developments happening globally, by coming up with innovating solutions to real world problems and by means to improve the existing technologies. Our most recent project of building shelters that can be functional and can offer livable conditions in extremely cold regions is one example.

Headquartered in New Delhi, we proudly house one of the best and widest range of infrastructure backed by an amazing team of engineers, architects, executives and event managers for providing end-to-end solutions for any and all big-day need.

Website : www.dilabs.in  
Contact Person Name : Rajagopal Venkatesh

### Profile

DILABS SYSTEMS PRIVATE LIMITED was incorporated in 2002 with the prime vision of making a significant contribution to the Avionics industry. Walking down the aisle of success, the company has hit several milestones that have paved the way for its monumental success towards achieving its vision. In the initial phase of its journey, the company began with design and development of Signal conditioning boards and gradually shifted to Complete Test Rigs for different Aircraft LRU's. This enabled the firm to take a giant leap as it exposed the team to the actual aircraft LRU's and the technology incorporated into these systems. Soon, the company began making some mock up units for an Aircraft simulator and designed Multifunction displays for an aircraft simulator. The company was involved in the design of the first IJT mock up for HAL which was showcased in one of the International Air Shows in Bangalore.

Phone : 7905088731  
Email : dirac.dgaqa@gov.in  
Website : dgaeroqa.gov.in  
Contact Person Name : Virendra Kumar Mishra

### Profile

Directorate General of Aeronautical Quality Assurance (DGAQA) is an Organisation established in 1954 under Department of Defence Production, Ministry of Defence. DGAQA is the regulatory authority for Quality Assurance and final acceptance of Military Airborne stores, Armaments, Consumables (FOL Stores), Allied Ground Systems and Missiles during Design & Development, Production, Repair, Modification and Overhaul/ Repair at various Defence PSUs, Ordnance Factories, DRDO Labs and Private Firms. It also ensures QA requirements during acquisition of defence aeronautical stores by Ministry of Defence as per the provision of DAP & DPM. The primary role of DGAQA is to provide QA coverage under Approval of Firm and its Quality Management System (AFQMS) concept during various phases of the production/services viz Design & Development, Production, Up-gradation etc. DGAQA is also involved in Indigenisation and Standardisation activities. The other services rendered are Capacity Assessment & Registration of Firms and Test labs. Atmanirbhar Bharat Abhiyan and Make in India: The Government of India initiative on Atmanirbhar Bharat and Make in India program, many Indian vendors venture in to Indigenisation projects for Indian military aircraft industry posing a significant challenge to the QA function in general and regulatory organizations like DGAQA in particular. The task of DGAQA is becoming more elaborate and challenging in view of large number of associated work centres, spread far and wide, necessitating a large parallel efforts to monitor QA systems. There are 48 field establishments / offices spread all over the country which are located at various work centres. We are now looking for Global Cooperation in the field of Defence Aviation QA and as such keen to have International bilateral Agreements on providing QA services for Defence Aviation Stores.

The company is led by Mr Sameer Joshi (Co-Founder and CEO) and Mr Julius Amrit (Co-Founder and COO) who have more than two decades of experience. The company has been a pioneer in India in UAS (UAV) swarming (Multi rotor unmanned systems - MUAS) and has secured multiple supply orders from the defence forces. NRT's team of 200+ engineers have developed advanced capabilities in 'Cyber Physical' systems, with the key domains being: •Autonomous Software: AI, ML, CV based algorithms for autonomous flights and imbibing concepts of collective robotics and advanced Human/ Machine interface •Manned Unmanned Teaming (MUM-T) •Aircraft Design - Multi-Disciplinary Optimization based design of aircraft platforms for best-in-class platform performance for a said use case •Manufacturing – 35,000 sqft of manufacturing facility • Flight Operations – Skilled Flight Ops team that has flown and operated different classes of UAV aircraft (Multi – Copters, Fixed Wing) over varied terrains NRT, since its inception has been the pioneer in India in autonomous 'UAV Swarming' and has been evangelizing this concept across the defence establishment (MoD, Army, IAF, Navy). The genesis for UAV Swarming at NRT was IAF's Meher Baba Prize for UAV swarming wherein IAF wanted Indian companies/ start-ups to demonstrate swarm operations for 'Humanitarian Aid and Disaster Relief (HADR)'. NRT won the competition and dominated all the participants with its swarm tech. Meanwhile the Indian Army very quickly identified the decisive edge that 'UAV Swarms' bring to their operations and went ahead with capability developmental orders (first order in Nov 2020) to NRT through its Secunderabad based division, Simulator Development Division (SDD) for UAV Swarms. NRT has recently made a record of successfully flying a UAV swarm of Nimbus at 25,000 ft above mean sea level. No other organization has been able to achieve this. NRT's flagship programs like Fixed Wing and HAPS are recognized by the Indian MoD and US Defence committee. NRT has also raised a Series – A funding of INR 160 Cr in Q1 2022. NRT has entered into Research and Development partnerships with the end user (Indian Army, IAF, Indian Navy) for developing Next Generation Mission Technologies (NG-MT) capabilities through indigenous Research and Development. NRT also has India's first collaborative research and development agreement (CRADA) with the US - Air Force Research Labs (AFRL) since 2019.

#### **Profile**

The long-standing relationship initiated in 1953 when India became Dassault Aviations first export customer with the Toofani and has been continuing without interruption since that date. The latest addition after the Mirage 2000 is the Rafale that was chosen to equip the Indian Air Force in September 2016. Dassault Aviation is committed to fulfilling the offset/Make in India obligation taken in the Rafale contract. It is in that frame that a state-of-the-art factory has been set up in Nagpur (Maharashtra) which will be assembling Falcon 2000 aircraft by 2022 and is aimed at assembling Rafale aircraft if future orders are to come. Dassault Aviation is furthermore developing an indigenous high added-value supply chain under the Make in India policy promoted by Prime Minister Shri Narendra Modi with aim to match the highest international aerospace industry standards. At the end of July 2020, despite the unprecedented COVID world health crisis and after a Dassault Aviation complete training of Indian pilots and technicians, five Rafale operated by Indian Air Force pilots took off from France and were ferried to Ambala Air Force Station to enter service in N°17 Squadron Golden Arrows. Today, while deliveries are on schedule, Dassault Aviation and its Rafale International partners, Safran Aircraft Engines and Thales, are committed to pursue this extraordinary long-standing cooperation by proposing the Rafale to the Indian Navy and the Indian Air Force to continue to support Indian defence and security for the next decades.

Sanghvi Aerospace Pvt. Ltd. (SAPL) pioneered the development and manufacturer of Polyimide insulated wires & cables for aerospace and aviation industry in 1992. The market potential was hazy. More so, the manufacturing technology was not available in India at that time. We developed these products, with our past experience of tape wrapped PTFE (Teflon) wire manufacturing, processing advise by raw material suppliers, requirements from users, guidance for test methodology & accept/ reject criteria by approving authority. The entire technology is indigenized including the manufacturing process, plant & machinery and test equipment
